

NOAH CLARK

PRODUCT ENGINEERING TEAM LEAD

ABOUT

I'm a product engineer team lead who has a unique passion for building elegant data models designed for maximum knowledge yield. I have a history of working on SaaS products, creating solutions from the ground up that are scalable, and maintainable, performant. Team player, team leader, Product, backend, frontend, I'm here to help those I work with succeed. My major focus currently is taking all the skills I've developed over a decade of engineering experience, and learning how to maximally utilize AI agents for e2e product development

PERSONAL SKILLS

AI Native Engineering
Creative spirit
AI Native Engineering
Excellent communicator / speaker
Highly self motivated
Reliable and professional
Organized
Time management
Team player
Fast learner
True love for writing software

PROFESSIONAL SKILLS

Languages:

JavaScript

PHP

Python

Typescript

Databases:

MongoDB

Postgres

SQLite

Neo4j

ClickHouse

MySQL

Dev Technologies:

REST

React

Cypress

CSS

Django

Enzyme

Jest

Storybook

ORM

tailwind

GraphQL

AWS

GCP

OpenAPI

Kubernetes

GKE

NX

GCP

AsyncAPI

ClaudeCode

Other:

SCRUM

AGILE

E2E Testing

DevOps

Test Automation

INTERESTS

Meditating | Reading | Traveling |
Consciousness | Software Projects

WORK EXPERIENCE

Cloud Team Lead

Quatt | Nov 2024 - Present

Led a team of 5 full-stack engineers building and operating the cloud platform behind a fleet of 20,000+ IoT-connected heat pump installations. Owned the full path from device telemetry ingestion (MQTT/AWS IoT Core) through real-time data processing, REST APIs, monitoring dashboards, and analytics pipelines. Worked daily across embedded firmware, cloud backend, mobile app, and data platform boundaries.

- Owned real-time telemetry pipeline (MQTT, IoT Core, SQS) for 20,000+ distributed embedded devices
- Redesigned fleet management dashboard — remote diagnostics, live telemetry, real-time device control
- Shipped 3 hardware products end-to-end: protocol design through commissioning, APIs, and dashboards
- Created Atlas, a platform context and tool integration layer meta-repo modeling 670 entities, 41 repos, 600+ device fields with cross-language type generation
- Drove cross-domain architecture across hardware, software, and data teams (protocol contracts, unified auth)
- Led engineers under the CTO, managed 20+ releases, built AI-assisted code review and debugging tooling

Tech Stack

- TypeScript, Node.js, Express, Prisma, MySQL, ClickHouse, Redis, MQTT, AWS IoT Core, AWS SQS, AWS S3, AWS IAM, BullMQ, Heroku, Kafka, OpenAPI, AsyncAPI, Sentry, Axiom, Grafana, HubSpot, Jira, Claude Code, MCP Protocol, GitHub Copilot, GitHub Actions, Jest, NX Monorepo, React

Founder

iAm | Sept 2023 - Present <https://iAmExplor.ing>

As the sole founder of iAm, a SaaS platform that enables the measurement and analysis of subjective experiences in real-time, integrating technology with cognitive science and meditation insights. My vision and execution evolved iAm from concept to comprehensive SaaS platform for understanding consciousness. Leading every aspect, I've propelled the project from concept to reality, aspiring to significantly advance the study of human experience.

- Designed highly flexible graph based data framework compatible with Neo4j
- Developed methodology for subjective experience measurement in real-time
- Single handedly designed, developed, and deployed SaaS Research Platform iAm, which combines survey and real-time reporting into unified graph
- Designed cross-platform implementation of iAm using Capacitor for Android and iOS

Tech Stack

- Neo4j, Typescript, Node, Apollo Server, GraphQL, React, AWS S3, Github, Google Analytics, Capacitor, Google Cloud (GCP), GKE (Kubernetes)

NOAH CLARK

WORK EXPERIENCE

ENGINEERING MANAGER / SENIOR FULL-STACK ENGINEER

Strategic Education Inc. | May 2021 - September 2023. <https://workforceedge.com>
Served as Engineering Manager with a strong focus on senior full-stack and tech lead responsibilities for a SaaS EdTech startup.

- Acted as the subject matter expert for the entire platform architecture and technology stack.
- Managed four software engineers and three QA specialists
- Led engineering team to design, develop, and deploy scalable solutions that met feature requirements and maintained overall platform health.
- Managed deployment processes and designed CI/CD pipelines for streamlined development cycles.
- Established and maintained DevOps pipeline, git workflow standards, and code review protocols to align with development best practices
- Successfully scaled the platform from a few hundred users and two clients to over 1.2 million users with 59 corporate partners

Tech Stack

- Typescript Node, Apollo Server, GraphQL, PostgreSQL, Redis, React, Gitlab CI/CD, Cypress, Artillery, Heroku, AWS S3, AWS Athena, AWS Secrets Manager, AWS API Gateway, AWS Lambda, Gitlab, Github, Sentry, Workato, Google Analytics, Github Actions

FULL-STACK ENGINEER / DATA MANAGER

Near Death Experience Research Foundation (NDERF) | Jan 2020 - May 2021

- Designed prototype system architecture for modernized NDERF application and collection workflow
- Designed and developed prototype API platform for NDERF's data, utilizing the following technologies & best practices:
 - git, kanban, node.js, Heroku, automated deployment, continuous delivery, PostgreSQL, React, Express, Jest

INSTRUCTOR TEAM LEAD / FULL-STACK ENGINEER

General Assembly | Jan 2020 - Dec 2020

- Taught and updated 500 Hour full-stack software engineering immersive course, teaching the following web technologies:
 - Git, HTML, CSS, JS, Python, React, Mongo, Mongoose, PostgreSQL, Storybook, Django, Jest, NodeJS, and Express
- Designed and developed an automated grading application in Node.js for DC Campus
- Designed and engineered a full-stack learning platform using spaced repetition and hierarchical knowledge graph data structure to improve student's learning, utilizing:
 - Heroku, Neo4j, Node.js, Express, React, and Netlify

NOAH CLARK

WORK EXPERIENCE

GEOSPATIAL ANALYST / SOFTWARE ENGINEER

Thermopylae Sciences and Technology | Nov 2018 - Jan 2020

- As a geospatial analyst, supported data collection of commercial imagery data
- As a developer, optimized collection pipeline using node.js to automate compression/decompression of imagery assets, saving 400 hours of manual labor

SOFTWARE DEVELOPER

Carnegie Mellon | May 2016 - May 2017

- Using MATLAB, I worked with the Principal Investigator at a neuroscience research laboratory. I was specifically responsible for developing an automated pipeline by which fMRI data could be normalized and analyzed using MATLAB.
- Designed and developed a full-stack psychology research platform for subjective experience, utilizing Neo4j, TypeScript, React, Angular, Google Cloud, Express, and Docker

SENIOR SYSTEMS ARCHITECT / SENIOR SOFTWARE ENGINEER

DMI / Thermopylae Sciences and Technology

May 2013 - Aug 2015

- As Systems Architect, was responsible for developing strategy and execution plan for helping the Defense Intelligence Agency (DIA) consolidate their \$1.1 billion IT infrastructure using centralized cloud technologies
- As a senior software engineer, I served as the software architect and lead software engineer for the DIA's IT asset management system. Used scrum and agile methodologies. Incorporated the following technologies:
 - OpenStack, Angular, PHP, d3.js, Neo4j, cytoscape.js, git

TECHNOLOGY CONSULTANT

Questor Federal | Jul 2011 - May 2013

- Served as a technology consultant focused on consolidation and reduction of duplicative efforts within the United States Intelligence Community (IC). Worked with senior level leadership to develop roadmaps to reduce IT footprint IC wide.

INTELLIGENCE ANALYST / PHYSICAL SECURITY PENETRATION TESTER

United States Air Force | Sep 2007 - Jul 2011

- Cyber intelligence analyst and physical security penetration tester responsible for testing the US Air Force's security posture, as well as briefing military personnel on cyber security threats

EDUCATION

JAVACRIPT ALGORITHMS AND DATA STRUTURES MASTERCLASS

Udemy | Jan 2021

SOFTWARE ENGINEERING IMMERSIVE

General Assembly | Sep 2020 - Dec 2020

- 500 Hour coding bootcamp intended to get me up to speed on latest programming technologies

BACHELOR'S OF SCIENCE IN COMPUTER SCIENCE | Cum Laude

Trident University International | Feb 2009 - Dec 2012
